LEVI PIGUES

Charlotte, NC | 984-292-7939 | lpigues@charlotte.edu | LinkedIn

EDUCATION

University of North Carolina at Charlotte | B.S. in Data Science | *Expected Spring 2028*

TECHNICAL SKILLS

Programming & tools: Python, SQL, Streamlit, Excel, Visual Studio Code; introductory R

Methods: Data analysis, exploratory analysis, data visualization, reporting, behavioral research

RELEVANT EXPERIENCE

EQ Strategists | Behavioral Science & Data Analytics Research Fellow | Summer 2026

- Developed interactive research dashboards with Python and Streamlit in Visual Studio Code to analyze EQ-GI emotional intelligence assessment data.
- Explored patterns and relationships in behavioral assessment results to support research questions and interpretation.
- Presented assessment data through visualizations designed to support exploratory behavioral science research.

Dropbox | Customer Analytics (CX) Intern | Remote | Summer 2024

- Analyzed customer behavior and support data with SQL and Excel to inform Help Center performance and organization.
- Conducted SWOT analyses of service platforms and collaborated with cross-functional teams on recommendations.

Spiffy Inc. | Account Management & Partner Success Intern | Raleigh, NC | Summer 2023

- Created quarterly business reports for a $3M enterprise client using SQL and Excel.
- Supported service-location setup, recurring reporting, and B2B partner coordination through the Conductor platform.

University of North Carolina at Charlotte | Resident Advisor | Aug 2026–Present

- Support student engagement, community standards, and resident well-being through peer leadership and resource referrals.

Elon University | Resident Assistant | Aug 2023–Jan 2025

- Supported residential communities of up to 40+ students through outreach, individualized guidance, and conflict resolution.

PROJECTS

NBA Fantasy Draft & Analytics Tool | Personal Project

- Built a Python and Streamlit application using NBA data and analytics to evaluate player value and inform fantasy draft strategy.

County Home Value Prediction | Python, Census API, Machine Learning

· Analyzed 3,215 U.S. counties using Census ACS data; compared Linear Regression and Random Forest models to predict median home values, achieving $R^2 = 0.735$ with Random Forest.

Spotify Explicit Content Analysis | Python, Spotify API, EDA

- Collected 50 tracks across five genre-related searches via Spotify API; visualized explicit-content patterns and track-duration trends, documenting API limits that prevented direct popularity analysis.

ADDITIONAL EXPERIENCE & LEADERSHIP

Harris Teeter | Overnight Grocery Stocker | Spring - Summer 2025: Worked overnight shifts, stocking grocery merchandise and supporting store operations.

Cisco High Extern: Selected from 650+ applicants; led an international IoT rail safety team project that placed second overall.

Center for Sport Business and Analytics Intern: Introductory basketball analytics experience with R and Python.

Campus: Charlotte Sales Network, Investment Club, Commercial Real Estate Club, Sports Analytics Club; Charlotte Women's Basketball practice player, Elon Women's Basketball practice player.
